OBJECTIVE

Aspiring Data Science and AI professional seeking an ML/AI Internship at Appobile Labs to apply machine learning, data analysis, and visualization skills in building scalable, data-driven SaaS solutions, while contributing to business process optimization and gaining hands-on industry experience.

EXPERIENCE

Business Analytics Intern — ThinkMates EduTech Pvt. Ltd Mar 2025 – Jul 2025

- Analyzed a 12K+ Zomato (Pune) dataset using Python, Excel, and Power BI to uncover customer behavior, pricing trends, and restaurant performance insights.
- Performed data cleaning and feature engineering (price tiers, rating bands, locality clusters, amenity indicators) to improve KPI accuracy and analytical consistency.
- Built interactive Power BI dashboards and generated actionable insights (e.g., rating–retention correlation, cuisine trends), enabling data-driven strategic and operational decisions.

PROJECTS

Sentiment Analysis System (NLP & Deep Learning) — [GitHub Link](#)

Python, TensorFlow, HuggingFace, Scikit-Learn, Streamlit Nov 2025 – Dec 2025

- Developed a sentiment analysis system using ML (Logistic Regression) and DL models (LSTM, BERT), achieving **95% accuracy**.
- Improved performance by **10–15% using transformer-based BERT** compared to traditional and RNN-based models.
- Designed an NLP pipeline with preprocessing (URL/mention handling, emoji normalization), tokenization, and feature engineering.
- Built a local Streamlit interface for real-time predictions and structured the project with modular training and inference components.

Customer Churn Prediction System — [GitHub Link](#)

Feb - 2026

- Developed an end-to-end churn prediction system using a **Random Forest Classifier** to identify high-risk telecom customers.
- Improved model performance by addressing class imbalance using **SMOTE** and encoding categorical features.
- Designed a **Streamlit**-based prototype interface with **Pickle**-serialized models for consistent and efficient predictions.

TECHNICAL SKILLS

Programming Languages:	Python, SQL (MySQL)
ML & Frameworks:	Scikit-learn, TensorFlow, Keras, Hugging Face Transformers
Data Analysis & Visualization:	Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel
Tools & Platforms:	Git, GitHub, VS Code, PyCharm, Google Colab, Streamlit

EDUCATION

2022 – 2026 **TKR College of Engineering and Technology (JNTUH)** Hyderabad, India
B.Tech in CSE (Artificial Intelligence & Machine Learning) **CGPA: 8.12 / 10.0**

CERTIFICATIONS

Introduction to Data Science — Cisco	Dec 2025
Certified Data Science Professional — Oracle	Oct 2025
Certified Generative AI Professional — Oracle	Oct 2025
Certified System Administrator — ServiceNow	Jul 2025
