

OBJECTIVE

Aspiring Data Analyst and Data Scientist with hands-on experience in Python, SQL, Power BI, and Machine Learning to leverage statistical analysis and predictive modeling to solve real-world business problems and support data-driven decision making.

WORK EXPERIENCE

Data Analytics Intern | ThinkMates EduTech Pvt. Ltd

Mar 2025 – Jul 2025

- Analyzed business datasets exceeding **10,000+ records** to define core KPIs and generate actionable operational insights.
- Engineered 3-tier interactive dashboards (Sales, Manager, CEO) using **SQL, Power BI, and Excel** to visualize growth opportunities.
- Developed analytical pipelines focused on data validation and unit testing, ensuring 100% data integrity across cross-team reports.
- Collaborated with cross-functional teams to translate complex business requirements into scalable data documentation.

PROJECTS

Tweet Eval Sentiment Analysis | [GitHub Link](#)

Oct 2025 – Nov 2025

- Built a **multi-model Sentiment Analysis system (LR, LSTM, BERT)** achieving up to **95% accuracy**, applying **advanced NLP techniques** and **transformer-based fine-tuning**.
- Designed **scalable data pipelines** for **preprocessing, feature engineering, tokenization, and evaluation**, improving **model reliability** and **end-to-end workflow efficiency**.
- Developed a **production-ready Streamlit application** enabling **real-time inference** with **optimized model caching**, enhancing **usability** and **deployment performance**.
- Utilized **Python, TensorFlow, PyTorch, Hugging Face, and Git LFS** to implement **reproducible ML workflows**, automate **training scripts**, and manage **large model artifacts**.

Customer Churn Prediction System | [GitHub Link](#)

Feb - 2026

- Developed an end-to-end churn prediction system using a **Random Forest Classifier** to identify high-risk telecom customers.
- Improved model performance by addressing class imbalance using **SMOTE** and encoding categorical features.
- Designed a **Streamlit-based** prototype interface with **Pickle-serialized** models for consistent and efficient predictions.

TECHNICAL SKILLS

Programming: Python, SQL (MySQL)

Frameworks & ML: Scikit-learn, TensorFlow, Keras, Hugging Face, Transformers, Streamlit

Data Tools & Viz: Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI

Developer Tools: Git, GitHub, VS Code, PyCharm

EDUCATION

2022 – 2026 **TKR College of Engineering and Technology (JNTUH)**
B.Tech in CSE (Artificial Intelligence & Machine Learning)

Hyderabad, India
CGPA: 8.12 / 10.0

CERTIFICATIONS

Introduction to Data Science | Cisco

Dec 2025

Certified Data Science Professional | Oracle

Oct 2025

Certified Generative AI Professional | Oracle

Oct 2025

Certified System Administrator (CSA) | ServiceNow

July 2025
